

People put /k/ above /h/, as token frequency does. Token-trained ALCOVE follows that order; RULEX gives almost no -ler on /h/ or /k/

—◆— people (95% CI)
—●— ALCOVE
—▲— RULEX
—□— real -at words, counted as the panel

Trained on types: ALCOVE puts /h/ above /k/

Trained on tokens: ALCOVE puts /k/ above /h/

People: 97 native speakers, mean of per-participant rates. Models: 5,000-word vocabularies, mean over learners (ALCOVE 20, RULEX 100). Stages 13-15.
